# Types of systems

#### Fully-Funded Individual System:

Private system. Each member has an individual account where they deposit their social security contributions, which are invested and returns earned on the investments made by the Administrators using the resources contained in the Funds.

#### Mixed Integrated System:

The fully-funded individual system and the pay as you go system coexist. The contribution as a percentage of the employee's remuneration is distributed between both systems. Participation in one of the two systems is mandatory according to age and level of earnings.

#### Mixed Competitive System:

The fully-funded individual system and the pay as you go system compete with each other. Employees (those who were members when the reform took place, as well as those now entering the job market) are obligated to choose one of these systems. The contribution of the employee is destined entirely for the system selected.

# PFA Industry in Latin America

Type of System									
-	Chile*:	1981	- Fully-funded individual						
-	Colombia*:	1994	- Mixed competitive						
<b>®</b>	Mexico*:	1997	- Fully-funded individual						
2	Peru*:	1993	- Mixed competitive						
*	Uruguay:	1996	- Mixed integrated						
w	El Salvador:	1998	- Fully-funded individual						
**	Dominican R.:	2003	- Fully-funded individual						
* *	Panama:	2002	- Under reform						
* Additi	Costa Rica:	2000	- Mixed integrated  lemented the Multi-fund system						

■ Latin American Pension Fund Administrators manage assets with an approximate value of USD 361.7 billon (Dec. 2011)\*, in a fully-funded individual system where the money accumulated, plus their returns are the property of the member.

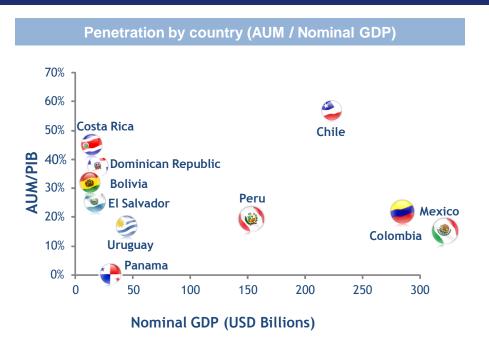

• As at December 2011, this industry at the Latin American level had approximately 76.6 million members\*, of which 45% was active members as at said date.

\*For the different report periods, statistics are presented only for Colombia, Mexico, Peru, Chile, Dominican Republic, El Salvador, Costa Rica and Uruguay.

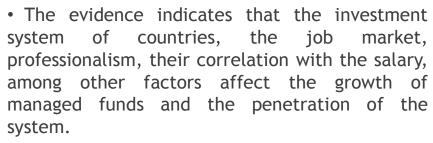

As at June 2011, the value of the funds managed increased to USD 397.023 billion among the following countries: Argentina, Bolivia, Chile, Colombia, Costa Rica, El Salvador, Mexico, Panama, Peru, Dominican Republic and Uruguay

# Penetration and coverage by country SU(a)

### Countries with greater coverage and potential:

- Panama, 1.1 million members
- Bolivia, 2 million members
- El Salvador, 0.5 million members
- •Dominican Republic, 1.4 million members
- Uruguay, 0.4 million members
- Peru, 6.6 million members

Source: Proper calculations using trends taken from the World Bank, Regulating Entities and Central Banks

Under the ceteris paribus principle

## Regional presence of major leaders

## The regional players include:

**SUCO** § Grupo de Inversiones Suramericana: AFP Protección in Colombia and AFP Crecer in El Salvador. Through Sura Asset Management: AFP Integra in Peru, Afore Sura in Mexico, ING Pensiones y Cesantías in Colombia, AFP Capital in Chile and AFAP Sura in Uruguay.

BBVA

Grupo BBVA: AFP Horizonte in Peru and Colombia, Afore Bancomer in Mexico, AFP Provida in Chile and Previsión AFP in Bolivia.

Bank of Nova Scotia: Scotia Crecer AFP in Dominican Republic and Profuturo AFP in Peru.

Source: Regulating entities of each country

# Supervisory structures

The supervisory structure in these countries is as follows:

#### Type of Supervision **Dominican Uruguay Bolivia** Colombia Costa Rica Chile El Salvador Mexico **Panama** Peru Other Other Other Central Specialised **Specialised** Specialised Specialised Specialised **Specialised** Superintendency Entity Superintendency Bank

**Specialised:** Refers to supervision that is the responsibility of an entity that has been created for the sole purpose of supervising Pension Fund Administrators.

**Other Superintendency:** Refers to supervision that is the responsibility of an entity that supervises different financial business, whether pension or otherwise

60% of supervision in Latin America is Specialised

Source: FIAP

## **Commissions**

Countries	Total Commission a	Insurance Percentage of the Salary b	IS Contribution d
Colombia	1.60%	1.40%	11.50%
Chile	1.87%	1.49%	10.00%
Costa Rica	Una	vailable	3.90%
El Salvador	1.53%	1.17%	
Mexico	1.38% Aver.	2.50%	6.50%
Peru	1.98%	1.36%	10.00%
Dominican Republic	1.60%	1.00%	7.40%
Uruguay	2.60%	1.00%	7.5% Aver.

- In Colombia, a commission is also charged for transfers, unemployed persons and voluntary contributions
- In Costa Rica, there is a commission on returns. Coverage for disability and death remains the responsibility of the public system, but its cost is not distinguished from the contribution for old age
- In the Dominican Republic, the net commission includes 0.1% for the operations of the Superintendency, 0.4% for the solidarity fund and an annual complementary commission that is deducted from the returns
- In Uruguay, an additional commission is charged, referred to as the commission for safekeeping

The commissions correspond with those reported by the regulating entities at the beginning of 2012. Any change in such commissions is not recorded in this presentation. Source: Superintendencies of each country

## Chile - Multi-fund system

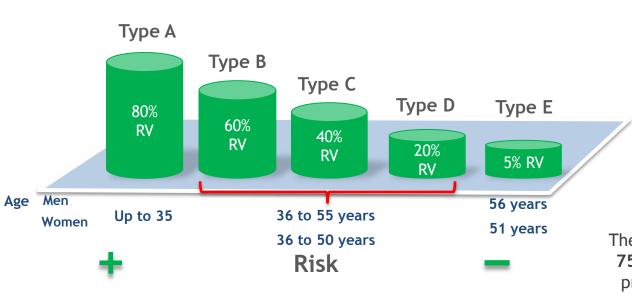

**Single fully-funded individual system.** The old pay as you go system is still in existence for those who elected to not join the private system at the time and new members cannot join that system.

In 2000, they implemented the multi-fund system, offering 3 of these funds, and by 2002, this offer increased to 5 multi-funds

√ Members can select the type of investment fund without any restrictions, whether A, B, C, D,
or E

✓ For employees who do not select any fund, their assets will be destined for funds B, C and D, based on the age range established for each fund.

## **Multi-funds**

No.of Co's	6
Penetration	53.8%
Coverage (EAP)	76.8%

The total number of pensioners in Chile is **751,995**, of whom 80.8% belongs to the private sector and 19.2% to the public sector

Source: Superintendency of Pensions in Chile

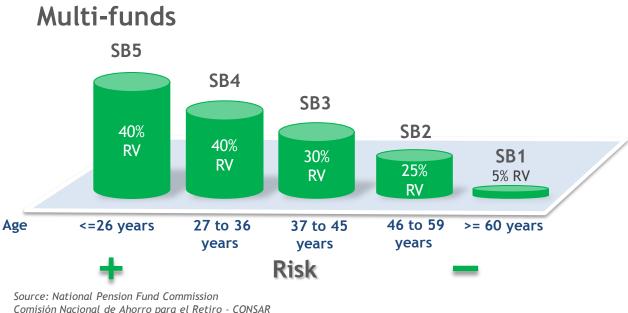

## Mexico - Multi-fund system

## Single fully-funded individual system.

- Mexico is different since it has several Pension systems, such as Private Pensions, Public Pensions (IMSS) and ISSSTE), local Pensions by States, among others.
- During the transition period, the benefit can be defined or not defined:
- Employees who contributed prior to July 1997 and were members of the pay as you go system can select, at the moment of retirement, between the amount accumulated in their individual account or the pension calculated.
- For those employees who began contributing from July 1997, the individual account is mandatory

No.of Co's	13
Penetration	11.2%
Coverage (EAP)	83.1%

The number of pensioners as at December 31, 2011 increased to 3,135,519\*

## 💶 Colombia - Multi-fund system

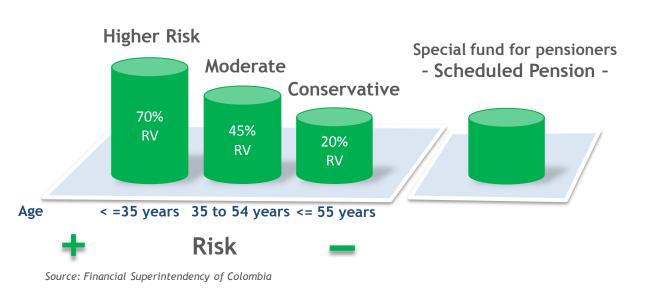

In 2011, the implementation of the multi-fund system began, with 3 investment options.

Under this system, members have 3 investment options defined by the maximum investment on variable income:

- ✓ Members can select any type of fund, with the exception of men over the age of 55 and women over 50, who must have 100.0% of their capital in the conservative fund.
- ✓ There is also a special fund for pensioners.

## **Multi-funds**

No.of Co's	6	
Penetration	19.7%	
Coverage (EAP)	63.9%	

The total pensioners at the end of December 31, 2011 was **51,357** 

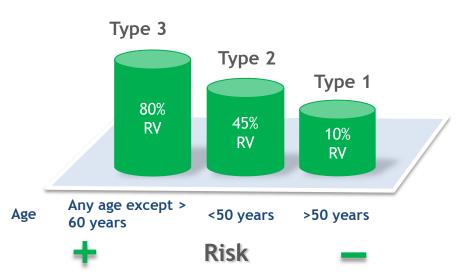

## Peru - Multi-fund system

Is characterised as a **mixed competitive system** between the ONP (Pension Standardisation Office - Oficina de normalización previsional) and the Pension Fund Administrators.

- ✓ In 2005, they implemented the multi-fund system. Under this system, members have 3 investment options defined by the maximum investment on variable income:
  - ✓ Members can select funds 1, 2 and 3 without restrictions
  - ✓ Members over the age of 60 cannot invest in fund 3

## **Multi-funds**

Source: Superintendency of Banks, Insurances and PFA's

No.of Co's	4
Penetration	17.2%
Coverage (EAP)	27.3%

The total pensioners in the private system at the close of 2011 was **56,776** 

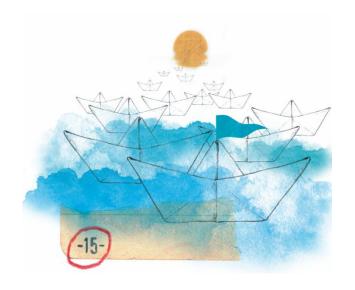

## Uruguay - Traditional system

- Mixed integrated system comprising the public tax system (Pay as you go pension system) and the mandatory individual savings system (Individual savings system).
- The individual savings system grants old age, disability and survival benefits. Old age benefits are determined based on the capital accumulated in the respective individual savings account.
- The contingencies of disability and survival are financed with the Group Insurance that the PFA's are obligated to purchase with an insurance company.

No.of Co's	5	
Penetration	16.2%	
Coverage (EAP)	56.6%	

Source: Central Bank of Uruguay

## El Salvador - Traditional system

**Single fully-funded individual** system, established in 1998. For members of the old system in El Salvador, only one middle age group had a period of time in which to decide whether to change or to stay in the old system, while it was mandatory for the younger members to change.

- The types of pensions granted by the system include: Old age, Early retirement, Total or partial disability and Survival.
- The age for receiving pension is 55 years for women and 60 years for men.
- The requirements for receiving an early retirement pension is that this must be enough to finance a pension that is > or equal to 60% of the basic regulating wage and must also be > or equal to 170% of the minimum pension.
- The means by which the individual can access the pension include: Scheduled pension, life annuity, scheduled pension with deferred life annuity.

No.of Co's	2	0000 000
Penetration	27.2%	
Coverage (EAP)	69.7%	

Source: Superintendency of the Financial System of El Salvador

## **Conclusions**

- One impact in Latin America is low contribution density and/or low incomes
- In Latin America, it is necessary to **promote actuarial analyses** that would consider present and future parameters in order to be able to **evaluate the solvency and sustainability of the pension systems.**
- Create awareness among the young population regarding ageing, promoting **financial education** and **voluntary savings by the client with tax incentives.**
- Promote the inclusion of informal and/or freelance employees, who do not participate in the pension systems through voluntary savings, which will yield great benefits in regional economies

## **Conclusions**

- The authorities in each Country must promote solutions that would guarantee financial stability for governments as well as pension fund administrators, thus it is recommended to:
  - Increase the contributions made by the government, company and employee for their pension funds.
  - Raise the retirement age.
- These measures could reduce the financial cost involved for governments as a result of the longevity of the population.

## **Conclusions**

## Opportunities for development:

- •Sustainable growth of countries through Investment in infrastructure projects by pension funds.
- •Expansion of the various types of assets of the different funds in which they could invest.
- •Achieve greater profitability for those contributing to the system, if the multi-fund system is strengthened.
- Improve portability, this challenge involves establishing a "communication" between the different regimes that allow workers to greater labor mobility.
- Simplify regulation
- Developing new services, cross -selling of another financial services to reduce the pension gap.

We have before us the great opportunity to contribute, as pension fund administrators, to the growth of our economies and to provide our employees with a deserving pension

# Severance benefits

**Chile:** Is managed by the SFA (Severance Fund Administrator) where the payments of the employee are deposited and in the event that said individual becomes unemployed, he can in turn access the *severance insurance*, which has a monthly benefit based on its accumulated fund, health services and training for job reinsertion.

Colombia: Is managed by the Severance Fund Administrator (Sociedad Administradora de Fondos de Cesantía - AFC). Severance benefits are mandatory in nature, originating in the job contract and must be recognised/paid annually by the employer to the employee. By Law, they are equivalent to one month of work for each year worked and are not paid directly to the employee but are instead forwarded to the Severance Fund of which he is a member. Their purpose is to serve as unemployment insurance to finance housing and higher education.

Source: Superintendencies of each country

## **Severance benefits**

**Peru:** Carries the name CTS (Severance Compensation) and involves the free availability of 70.0% of the surplus of 6 gross remunerations in the account. Can be managed by any company in the financial sector but not by PFA's. The severance compensation is deposited half-yearly in the institution selected by the employee.

**Mexico:** Has the **Partial pension due to unemployment**. Is managed by the Mexican Social Security Institute. Is a system to protect the unemployed that translates into an economic benefit paid through the Afore:

**Pension A:** 30 days of the Basic Contribution Wage (SBC) with a limit of 10 minimum wages. (To access the pension, members must have 3 years of service and 12 bimonthly contributions).

Pension B: Whichever is less between:

- 90 days of the Basic Contribution Wage or
- -11.5% of the balance of the subsidiary account for Pension, Severance and Old age. (To access the pension, members must have 5 years of service).

This benefit can only be accessed once every five years. Also, the funds granted will be subsequently reincorporated into the individual account.

# Chile – Access to pension

#### Types of pension granted by the system:

- 1.0ld age
- 2. Early retirement
- 3. Total or partial disability
- 4. Survival

Means by which the pension can be accessed:

- 1. Scheduled pension
- 2.Life annuity
- 3. Temporary annuity with deferred life annuity \*
- 4.Immediate life annuity with scheduled pension\*

The requirements for receiving an early retirement pension are that this must be enough to finance a pension that is equal to or greater than 70% of the average remunerations for the last 10 years and as a second requirement, it must be equal to or less than 150% of the minimum pension according to the law.

The total number of pensioners in Chile is 751,995, where 80.8% belongs to the private sector and 19.2% to the public sector
